- Implemented Proof Script for [PVerifier](#) and contributed to its release

Amazon Web Services, Santa Clara, CA May. 2024 – Aug. 2024

Applied Scientist Intern (C#/Java/P/Distributed Systems/Formal Methods)

- Developed the *PInfer* framework that **discovers likely invariants for distributed systems** from event traces. Paper accepted at OOPSLA'26.
- Implemented a formal model and specifications of the **Raft** consensus algorithm in [P framework](#)
- Modeled and proved the correctness of Ring leader election, Paxos, and an AWS internal service in *PVerifier*

Compiler R&D Intern (C++/Python)

- Refactored the intermediate representation (IR) of Taichi Language
- Implemented standalone **Tensor type** for better compilation speed
- Adapted **compiler passes** (e.g. Load/Store forwarding, Dead code elimination, reaching definition, etc.) to optimize for tensor type expressions
